

Synthetic Historical Well Drilling Report

SYNTHETIC DEVELOPMENT DOCUMENT. This report is generated from the NWIS MVP synthetic database for demonstration and testing. It is NOT a real Oil India Limited drilling report and must not be treated as operational or confidential OIL material.

Well identification

Well ID: W015. Field: Field-C. Well type: Development. Status: Abandoned. Total depth: 3280.0 m. Surface location (synthetic): latitude 23.638558, longitude 87.096763.

Formation intervals

Formation-A: 0.0-643.1 m. Lithology: Sandstone. Pressure: 34.96. Temperature: 36.76.

Formation-B: 675.6-1308.5 m. Lithology: Shale. Pressure: 41.68. Temperature: 44.47.

Formation-C: 1305.6-1985.2 m. Lithology: Limestone. Pressure: 44.44. Temperature: 61.04.

Formation-D: 1978.0-2634.2 m. Lithology: Dolomite. Pressure: 53.0. Temperature: 68.84.

Formation-E: 2616.8-3280.0 m. Lithology: Siltstone. Pressure: 56.53. Temperature: 79.37.

Drilling observations

This well has 150 synthetic drilling-log samples in the NWIS database. The following observations summarize those records by formation interval. No additional drilling events are inferred beyond the stored logs and events table.

Drilling observations in Formation-A (0.0-643.1 m, lithology Sandstone): 8 synthetic log samples. Mean ROP 31.41 m/h, mean WOB 11.13, mean RPM 111.73, mean torque 15.34, mean standpipe pressure 2329.70, mean mud density 1.08. Non-normal event_label rows in this interval: 0.

Drilling observations in Formation-B (675.6-1308.5 m, lithology Shale): 34 synthetic log samples. Mean ROP 28.26 m/h, mean WOB 11.67, mean RPM 115.52, mean torque 16.39, mean standpipe pressure 2361.67, mean mud density 1.09. Non-normal event_label rows in this interval: 5.

Drilling observations in Formation-C (1305.6-1985.2 m, lithology Limestone): 36 synthetic log samples. Mean ROP 24.41 m/h, mean WOB 12.32, mean RPM 115.10, mean torque 18.65, mean standpipe pressure 2446.17, mean mud density 1.10. Non-normal event_label rows in this interval: 15.

Drilling observations in Formation-D (1978.0-2634.2 m, lithology Dolomite): 35 synthetic log samples. Mean ROP 23.95 m/h, mean WOB 13.41, mean RPM 114.65, mean torque 17.91, mean standpipe pressure 2571.20, mean mud density 1.13. Non-normal event_label rows in this interval: 2.

Drilling observations in Formation-E (2616.8-3280.0 m, lithology Siltstone): 36 synthetic log samples. Mean ROP 18.79 m/h, mean WOB 13.95, mean RPM 112.87, mean torque 21.32, mean standpipe pressure 2659.60, mean mud density 1.14. Non-normal event_label rows in this interval: 9.

Historical events

3 historical event record(s) are stored for W015. Each item below is copied from the synthetic events table.

Historical event at 1339.6 m in Formation-C. Event type: MUD_LOSS. Severity: HIGH. Observation: Mud volume loss was observed during drilling.. Cause: Losses into a permeable or fractured

formation interval.. Mitigation: Reduced pump rate and applied controlled lost-circulation treatment.. Outcome: Mud losses stabilized and drilling continued..

Historical event at 1936.6 m in Formation-C. Event type: HIGH_TORQUE. Severity: MEDIUM. Observation: Torque increased significantly while drilling through the interval.. Cause: Increased formation resistance and poor hole-cleaning conditions.. Mitigation: Adjusted WOB/RPM and improved circulation parameters.. Outcome: Torque returned toward the normal operating range..

Historical event at 2925.5 m in Formation-E. Event type: STUCK_PIPE. Severity: HIGH. Observation: Drill string experienced elevated resistance and became temporarily stuck.. Cause: Increasing torque and declining rate of penetration in a mechanically unstable interval.. Mitigation: Circulation, controlled WOB reduction, and reciprocation of the drill string.. Outcome: Drilling resumed after controlled freeing operation..

Source statement

All well, formation, drilling-log, and event values in this PDF were copied from the local NWIS synthetic PostgreSQL database. The document does not add wells, depths, causes, mitigations, or outcomes that are absent from those tables.
